

GUIDE

TO

SUBJECT HEADINGS

USED FOR SHELVING MONOGRAPHS IN THE ARMY MEDICAL LIBRARY PRIOR TO
THE CLASSIFICATION SCHEME CURRENTLY USED. SPECIFIC LOCATIONS AS
TO FLOOR AND ROOM NUMBER ARE INDICATED FOR MATERIAL SHELVED IN
ANNEX. MONOGRAPHS SHELVED IN MAIN BUILDING ARE ARRANGED ALPHABETICALLY BY SUBJECT ON THE 2ND. FLOOR OF STACKS IN LIBRARY HALL.
THIS GUIDE HAS BEEN REVISED BY THE STACK SERVICE OF REFERENCE DIVISION 28 MAY 1948.

INTRODUCTION

Monographs published in 1920 to date are practically all shelved in the Main book stacks.

The Annex collection comprises generally publications in monographic form with publication dates up to and including 1919. In some instances, however, certain subject classifications are excluded from this arrangement and the library's entire holdings, regardless of date, are shelved either in the main stack collection or in the Annex.
